RESPONSE

Connect User	[.] Guide	22

COMMUNICATE, COLLABORATE, COORDINATE

The Response platform is a low-cost simple-to-use web and mobile situational awareness platform for day-to-day and emergency operations.

The Locate, Connect and Activate modules can be purchased in any combination or independently in accordance with your operational needs and budget. Intrepid Report, a automated ICS Forms solution, is also available, along with a separate User Guide.

Intrepid Web Portal

Intrepid web applications can be accessed through this portal.

NOTE: If your Web Portal does not display all the applications that you expect, please contact your organization administrator to add the appropriate license permissions for your user account.

- 1. To access the portal go to https://go.intrepidsuite.com and log in with your user name and password credentials.*
- * Contact your Response Administrator if you do not have credentials.
- **2.** Choose from the list of applications to open.
- **3.** Selecting your user name in the top-right hand of the browser screen displays quick links to your User Profile, Organization (Organization will only appear if you are a Response administrator) and the log out option.
- **4.** Click on the Quick Links menu in the top-right hand of the screen to access short cuts to your applications as well as the Channels and Groups that you belong to. If you have administrator or supervisor permissions, then you may also create channels and groups from these shortcuts.

2. Groups: To view the status of Groups of users that have been Activated, click on the Groups Tab.

3 The dispatcher can end the activation by selecting the End Activation button in the top-right of the browser window. All activation requests will be canceled and a notification will be sent to all users that the incident has ended.

RESPONSE

WEB Locate USER Guide

LOCATE WEB: DASHBOARD AT A GLANCE

- **1. User Tile:** Displays the team color (left-hand bar color), profile photo, call sign, full name and marker icon.
- **2.** Access Personnel, Marker, and Shapes list by selecting the appropriate tab. Add New Markers and Shapes from this tab.
- **3. Select Channel:** Open the Channels list view and select the channel you want to become active.
- **4. Channel Layers:** Overlay additional channels to the Locate map (Administrator and Supervisor only).
- **5. Address Search Bar:** Search for specific addresses within the Google database to instantaneously center the map upon.
- **6. Export/Import KML:** Create KML files of markers and personnel breadcrumbs that can used for after action reporting and be easily imported into future operations

- **7. Quick Link Menu:** Access short cuts to your applications as well as the Channels and Groups you are participating in.
- 8. User Options: Access user profile and logout.
- **9. Static Location Marker:** This is a location of interest that is stationary on the map. Choose from a large library of marker icons and colors.
- **10. Personnel Marker:** Live and static locations of all users active within a channel.
- **11. Coogle Map Settings:** Choose the appropriate setting on the bottom-right of the Locate browser window for map type, traffic and zoom level. Google street view is also available.

LOCATE WEB: SELECTING CHANNELS

Channels

Channels segregate information into operational containers and only allow invited users to share and view operational data within unique channels. Channels enable organizations to manage multiple operations, departments, sectors, groups or investigations simultaneously. Channels are created by your organization administrator. There are two types of channels within the Intrepid Application:

- **Organization Channels** which belong to your organization and limit membership to only members of your organization.
- **Mutual Aid Channels** which allow your organization to share intelligence with other external organizations for mutual aid and intelligence gathering. Channels can be created by organization administrators and supervisors.

A Mutual Aid Channel owned by another organization will initially invite member(s) of your organization through an email. Mutual Aid Channels are identified by the icon '

Your channel 'selectors' are shown in the upper left of the Locate Web Page.

As a user of the Locate application, you are able to select one channel for reporting location and creating markers and shapes. This is called your ACTIVE channel. Your active channel will default to 'General' when you first access the Locate application. By clicking on the Channel icon in the upper left of the Locate Map web page you will be shown a 'Choose Active Channel' dialogue (as shown below) which allows you to change the channel you are reporting information into.

LOCATE WEB: SELECTING CHANNELS CONT.

Channels

1. To change your active channel, tap the Select Channel icon at the top left of the screen. A pop-up will display a list of available channels to choose from. The General channel includes everyone in your organization and is your default channel upon first time login.

NOTE: A blue dot to the left of the channel name denotes the active channel you are participating in.

2. As a Locate user you are also capable of viewing multiple channels on the Locate Map at one time. By clicking on the visible channels icon the following dialogue display will be shown, allowing you to select multiple Channels overlayed on your map. Your active channel is always visible on the map as shown on the Visible Channels selection display. However, selecting many visible channels for display can cause your map display to be cluttered and unreadable.

NOTE: Before removing or deleting a specific User from the Intrepid Response Platform, please note that doing so will cause all Markers, Shapes, Messages, and Files created by that User to also be removed from the Locate Map, Connect and Notebook Log, and Channels that the User was a part of. Instead of removing a User completely, we recommend toggling that User's profile status to "Inactive" within the Admin Web portal. Doing so will allow those Markers, Shapes, Messages, and Files to remain within the Platform, while not adding to the total subscription count of a organization.

LOCATE WEB: PERSONNEL TAB

- 1. Each User Tile displays the Team Color, Profile Photo, Call Sign, Full Name and Marker Icon. Select a User Tile from the list to center that user's location on the map, and also get turn-by-turn directions to that user's location.
- 2. The General channel is selected by default. To change your active channel, tap the Select Channel icon in the upper left corner of the interface. The Choose Active Channel pop up will appear. Select the radio button next to the channel you wish to change to.
- **3.** Stale users will always appear grayed out on both the Personnel List and the Map. Stale is a specific Response user state that defines users who have lost connectivity or location for over three minutes but have not logged out of Response.
- **4.** Select the small arrow icon to display Personnel view options. Additional selections are available here to manage the display of assets on the map as well as additional options for breadcrumbs.

LOCATE WEB: MAP BASICS

1. Personnel Marker: This icon indicates the live or static location of a user. Click to expand the marker for full name, time and date of last activity in channel, plus latitude and longitude. Click the Personnel tab near the topleft of the screen to access a list of active personnel. Choose the three dots inside the User Tile to get turn-by-turn directions to that user's position if Google can determine your laptop/PC location.

NOTE: You can toggle between the personnel and marker list views using the tabs on the left-hand side of the browser window.

- **2.** Choose the appropriate Google Maps settings on the bottom-right of the Locate browser window for map type, traffic and zoom level. Google street view is also available.
- **3.** Additional User Display Options: Select the small arrow on the Personnel List tab. View breadcrumbs, change user icon colors (supervisor and administrators only) and hide stale connections from this menu. For the breadcrumb display in particular, choose Breadcrumb Options in the bottom right of the list. Select the users and the time box window to display the breadcrumb trails to your needs.

NOTE: Breadcrumbs are only available for users within the last 24 hrs.

LOCATE WEB: MAP BASICS CONTINUED

- **4. Channel Overlay:** (Response administrators and supervisors only) Select the small stacked icon at the top-left of the browser window to display all the channels overlay options. Select all the desired channels for overlay on the map and click Done. The number next to the icon indicates the quality of layers currently visible at the same time.
- **5.** Map Markers: These icons can be created and placed anywhere on the map to mark locations of interest. Select from a wide array of icons and colors to differentiate the marker against others. Click to expand the marker for name, date and time created plus latitude and longitude information, marker attachments, attached URL, attached streaming URL, the ability to Create Activation, turn-by-turn directions to that marker, and access to the Edit or Delete options.

NOTE: Only Admins, Supervisors, and the Users who created the Marker can delete the marker.

6. Additional map marker view and edit options are available by clicking the small arrow at the top of the Marker tab.

LOCATE WEB: CREATE MAP MARKERS

MAP MARKERS

1. To place a new marker select the "+ Add New Marker" button at the top of the Markers tab in the top-left of the browser window.

Click the location on the map you would like to place the marker. A pop-out menu for marker options will open. Enter marker name (optional), insert a URL web link (optional), insert a URL Video Streaming link (optional), choose a marker type icon and color. When finished, click Create.

Your marker is now placed on the Locate map.

LOCATE WEB: MAP MARKERS ATTACHMENTS

1. To add Marker Attachments, select the marker you wish to add an attachment to. In the expanded marker menu, select paperclip or attachments icon under options. This will open the files on your computer, where you can select the files you wish to attach and name the attachment.

Attach up to 6 files per marker in the form of a JPEG, PNG, or PDF and up to 5MBs in size.

LOCATE WEB: PICTURE IN PICTURE

1. To add a streaming video link, select the user, map marker, or shape you wish to add the link and click "Insert Streaming Media Link".

NOTE: The link must begin with 'HTTPS' and end with the '.mp4' file extension.

2. To launch the Picture in Picture feature, click the link in the expanded marker. To close the Picture in Picture feature, click on the 'X' in the upper right corner of the video player.

Mouse over the video player window to bring up the video player options. Here a user can pause or play the video, download it, change the playback speed, or enable a moveable Picture in Picture box that can be moved around the computer screen for easy monitoring.

LOCATE WEB: CREATE SHAPES

- **1. Drawing Shapes:** Use the shape Tool Bar to define areas of interest on the map. Select the polygon type you wish to place and click a starting point on the map for your shape. Continue adding vertices until the polygon is completed. Once the shape is finished, measurements of each line segment will display around the perimeter.
- 2. Shape Options: Click the down arrow on the shape toolbar in the top-middle of the browser window. Choose color, transparency, display labels on/off and measurement units first (Supervisors and Administrators only: You also have the option to delete all shapes from the Locate map).
- **3. Expanded Shapes:** Click the Shape to open the expanded menu. Here you can see the name of the shape, who created the shape, and its current location. You can also edit the shape from this menu, get directions to the shape, show dimensions, or delete the shape if you are the user who created it or an admin.

LOCATE WEB: CREATE SHAPES CONTINUED

3. Drawing Dots: Use the Dots Group tool to place Dots on the Locate Map to mark areas of interest or importance. The Dots do not have measurements like Shapes but they can be labeled and will highlight the selected Dots shape when selected. Change the color and opacity as needed. Only the user who created the Dot Group, as well as a team admin, can delete the object.

Dots are another way the Locate Map is customizable and easy to work with for your organization or operational needs.

4. Expanded Dots Shape: Click the dot shape to expand the menu. Here you can see the name of the shape, who created the shape, the date and time it was created, along with options to edit or delete the shape.

LOCATE WEB: EXPORT AND IMPORT KML FILES

IMPORT KML

EXPORT KML

a 🔹 🖋 - 🖸 - 🖉 E -

1. Export Channel Data to KML: For after action reporting and easy operation flow, Channel Data can be exported as a KML file that can be easily uploaded to additional channels or reports. Markers, Shape, and Personnel Breadcrumbs are included in this export.

Click the export KML button. Select a Start and End Date and a Start and End Time of day. All information will be exported within the timeline you choose. Click download KML file when your selection has been made. The file will automatically be downloaded and an additional copy will be emailed to your user email.

2. Important Markers and Shapes: Import Markers and Shapes clickly and easily by uploading a KML file directly through the Locate Map.

Once you have a KML ready for importing, click the import KML button. Select the Channel Location you wish the markers and shapes to be uploaded to. Then select the file from your computer. Click import and the file will be uploaded to your Locate Map.

Export Channel Data to KML

How to Use Connect Chat

In Chat, users have many formats to share information within the active channel. These include text messages, photos, short videos, documents, contacts, white boards and tasks. Users can also annotate drawings or embed multi-media on many of these individual message elements.

NOTE: Select the Double Checkmark icon under your message to view Read Receipts. See which team members in that Channel have or have not seen your message.

1. Text Messages: To post a text message, tap the message bar that displays "Send message..." at the bottom of the screen to engage the text box. Type the desired text in the box and select return to share the text message in the active channel. Emojis are also supported within Connect.

CONNECT: CHAT CONTINUED

- **2.** To share other kinds of multi-media messages and perform more complex message operations, choose the plus "+" icon in the bottom left corner.
- Files Add Files from the Desktop or your personal storage for multi-media files that can be shared to the active channel.
- Acknowledgement Creates a request for acknowledgement that is sent to any assigned team member.
- **To-Do –** Creates a task that can be shared within the active channel.

- **Note –** Create notes or comments that are not text messages.
- Whiteboard An electronic version of a traditional physical whiteboard. Add a multimedia file for white board annotation such as a floor plan or external map.

CONNECT: CHAT CONTINUED

3. Modify Multi-Media: Hover over an item in the chat dialog window to access these options:

Add Comment - Add a written comment.

More Options – File Information, Download, Move To another folder or location, Create a To-Do task associated with this item, Create an Acknowledgement for that Message, Pin, and Delete options.

NOTE: When creating an Acknowledgement, you can add a Title, Description, Due Date, and Assign the team member who needs to acknowledge the notification. This ensures team members get additional notifications for important communications.

CONNECT: ACTIONS

Actions is a feature in Connect that provides a quick way to create a unique team task list for each channel in Response.

To add new actions, select the orange plus (Add a To-do item) at the top of the Action window and enter the title or objective, select Send To-Do to complete the entry.

- **1. Add a Acknowledgement or To-Do:** To add new acknowledgement or to-dos, select the orange + at the top of the Actions window and enter the title and description of the To-Do, Due Date, and Assignee for the Action then select Send To-Do.
- 2. Managing Actions: Response operators have multiple management options once a To-Do is created in Connect. Select a To-Do from the Actions list and the details become available. A user has the capability to modify and edit To-Dos with the following options: Description, Set a due Date, User Assignment, Add Comment or Attachment, Mark Complete, Pin, or Delete the task.
